

## Learn How to Master Crosswind Landings

Taught by veteran instructor Robert Haynes, you will explore both principle and technique of crosswind landings. You will see the technique demonstrated on a full motion simulator from multiple view points. You can even try your hand flying the simulator in a stiff crosswind. (the immersion factor is incredible). The techniques presented will work in any aircraft (C172, Super Cub, Cirrus, Citation Jet or King Air).

Expect your confidence and understanding to boost to a new level.

"After an hour training in the simulator with you, I went out the next day and actively sought crosswind landings. It made such a HUGE difference for me! Paul B. - Student Pilot

Drive/Fly to KMQJ Airport and enter the Jet Access FBO. Follow the signs.
