

# When It Comes To Approaches & Landings - There Ain't no 10!

The program will focus on improving your knowledge and skill during the most critical phase of flight - Approach and Landing. NTSB Statistics verify that the vast majority of accidents and incidents occur in the approach and landing phase of flight. Learn about ways to avoid having your name published in one of their reports (the fifteen minutes of media fame that nobody wants)!

**Directions:** Event will be held at the Airport Public Safety Building located at Outagamie County Regional Airport.

## A message from the National FAAS Team Manager

Over 136,600 pilots earned WINGS credits last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
