

Wisconsin FAASTeam presents:

# Avoiding VFR flight into IMC (Instrument Meteorological Conditions)

According to the Nall Report, of the weather related accidents, available data suggests that, as always, attempts to fly by visual references in instrument conditions accounted for most of the weather related fatalities.

This seminar will build awareness on the topic and discuss techniques to avoid this activity. Perfect for student pilots and pilots of all levels of experience - including instrument rated pilots. Believe it or not, instrument rated pilots can get into trouble with this too! Learn how to avoid VFR flight into IMC and how to safely escape inadvertent IMC.

6pm to 7pm Social Hour (Frasca simulator demos, coffee, snacks, and "hangar flying")  
7pm Seminar Associates Degree InfoAssociates Degree Video

**Directions:** Gateway Technical College Horizon Center at KENW.

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
