

FAASTeam presents:

Mastering the Art of Instrument Navigation

Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. However, the training program that you employ can make the difference between success or failure in your instrument flying endeavors. The IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Safety and proficiency are developed through education and experience. Don't miss this meeting and learn how you can use real world scenarios to increase your level of safety. An instrument rating is not required for attendance.

Directions: Vette Theater -- use main entrance to Museum and follow signs

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
