

Wisconsin FAASTeam presents:

Hail to the Wing - IFR Scenario: Green Bay IMC Club

A serious concern, inflight hail. What would you do if you encounter these conditions? A good activity for anyone interested in instrument flying. Use real world scenarios to increase your level of safety in the IFR environment. Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. The Green Bay IMC Club provides organized "hangar flying" focused on building proficiency in instrument flying. An instrument rating is not required for attendance. This meeting will also include a short introductory iPad seminar and discussion of upcoming iPad user group.

Directions: Upon entering the double doors at the main entrance of Jet Air, please look for a sign for the event location. Depending on the number of registration it will either be held UPSTAIRS or in the conference room on the first floor. Please sign-in to receive Wings credit.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
