

Wisconsin FAASTeam presents:

**'Icing Decisions' IFR Scenario and Snowflake Approaches:  
Green Bay IMC Club**

A good activity for anyone interested in instrument flying. Use real world scenarios to increase your level of safety in the IFR environment. Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. The Green Bay IMC Club provides organized "hangar flying" focused on building proficiency in instrument flying. An instrument rating is not required for attendance. This meeting is a continuation of last month's cold weather flying considerations, including icing and snowflake approaches. What is a snowflake approach? Join us and learn about these approaches, which address a potential danger affecting those of us who fly in very cold climates. The meeting will also include a presentation by one of our members about a recent real-life IMC emergency.

**Directions:** Upper Level Meeting Area

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
