

Wisconsin FAAS Team presents:

The Ins and Outs of ADS-B

This presentation will peel back the layers of the ADS-B onion, and help answer critical questions, such as:

- What exactly is ADS-B?
 - Why did the FAA mandate this? Who really needs to comply?
 - What's the difference between 1090ES and UAT, and why do we have two different technologies?
 - Are there any benefits to equipping now?
 - Can I get any benefits if I'm not equipped, and what's this I keep hearing about "hockey pucks"?
 - What's the state of the art? Is it going to get cheaper if I wait?
 - What are the privacy implications of equipping?
- Joe Schmidt serves as the department chairman for the Fox Valley Technical College at Oshkosh and holds FAA Certificates; A&P and DME as well as a Private Pilot certificate.

Directions: This seminar will be located in the Jet Room Restaurant located in the Wisconsin Aviation Fixed Base of Operation.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
