

Wisconsin FAASTeam presents:

Long Flight - EAA Chapter 252 IMC Club Monthly Meeting

A discussion of the IFR Scenario "“Longer Flight Than Expected” will presented by Joe Norris, CFI. Pilots flying small airplanes IFR in busy airspace sometimes get amended clearances. Enough said?

Use real world scenarios to increase your level of safety in the IFR environment. Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. The EAA Chapter 252 IMC Club provides organized “hangar flying” focused on building proficiency in instrument flying. An instrument rating is not required for attendance. Guests welcome.

Directions: Leadership Classroom -- please use employee parking entrance to the EAA Aviation Center (North of main Museum entrance) and enter the doors under the simulated control tower cab.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
