

Loss of Control - Education Series

Many Loss of Control accidents have occurred where airmen were unfamiliar with the visual or cockpit instrument cues for their aircraft in flight attitude as; level, climbs, descent, turns.. The importance of having the aircraft trimmed to a level flight 'hands off'... Typical distractions that lead to loss of control... recovery from unusual flight attitude... Human factors relating to disorientation, and Situational awareness of terrain (e.g. what is our AGL?) Topics covered during the seminar: Aircraft Attitude, Essence of a Trimmed Aircraft, Distractions, Human Factors, Terrain Avoidance

Directions: Enter airport entrance off Gumina Rd, Gumina Road runs parallel to Captiol Drive to the north. Office Building is located on the Left (West), near fuel farm.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
