

Wisconsin FAASTeam presents:

The Ins and Outs of ADS-B

This will be a joint two part presentation involving industry and the FAA. Our first speaker will be Avionics expert and FAA Safety Representative. Our second speaker will be Jurg Grossenbacher FAASTeam Program Manager from the Milwaukee FSDO.

This presentation will peel back the layers of the ADS-B onion, and help answer critical questions, such as:

- What exactly is ADS-B?
- Why did the FAA mandate this? Who really needs to comply?
- What's the difference between 1090ES and UAT, and why do we have two different technologies?
- Are there any benefits to equipping now?
- Can I get any benefits if I'm not equipped, and what's this I keep hearing about "hockey pucks"?
- What's the state of the art? Is it going to get cheaper if I wait?
- What are the privacy implications of equipping?

Directions: This seminar will be located in the Conference room located at 3606 Corben Court at the Wisconsin Aviation Fixed Base of Operation.
