

Why we fly Cirrus - Discuss Parachute Pull in Wisconsin

Cirrus designed an aircraft with extra safety features because we are human. If we were perfect without flaws, none of these safety features would be needed. But the truth is we all react differently and have a different level of recurrent training. We will analyze and discuss a recent parachute pull within Wisconsin and hear an emotional first hand recount of the pilot. The video we will be watching is courtesy of IMC Club, used with permission. This is not an official IMC Club event but mimicks one very closely.

Directions: Enter the executive air main building and proceed upstairs to the Pilotsmith classroom area.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
