

## NOTAMS What You Need to Know

While aviation charts, instrument approach plates, and chart supplements contain a wealth of information, they don't always have the most up-to-date information.

This presentation on NOTAMs can help you discover the skills and tools to access the latest flight information.

In this seminar, we will discuss: Types of NOTAMs and their components Resources for accessing this critical information Temporary flight restrictions and how to avoid them

**Directions:** This seminar will be conducted in the Conference Room: located through the first door on the left in the main hallway.
