

ICAO Flight Plans

While most pilots are familiar with the process of filing FAA flight plans, the new ICAO flight plan requirement mandated in August 2019 has left a lot of us scratching our heads. This is especially true when it comes to the new equipment codes!

In this seminar we will cover how to properly fill in ICAO flight plans, their differences from FAA flight plans, and how to use technology such as ForeFlight and 1800WxBrief.com to simplify the flight planning process.

Directions: This seminar will be conducted in the Conference Room: located through the first door on the left in the main hallway.
