

Wisconsin FAAS Team presents:

Going Up or Down EAA Chap 252 IMC Club

"Going Up, or Down" - a discussion of a challenging weather scenario facilitated by Joe Norris, CFI

Guest instrument pilots and students welcome. Use real world scenarios to increase your level of safety in the IFR environment. Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. The Fox Valley (WI) IMC Club provides organized "hangar flying" focused on building proficiency in instrument flying. An instrument rating is not required for attendance.

Directions: Leadership Classroom -- please use employee parking entrance to Aviation Center (North of main Museum entrance) and enter doors under the simulated control tower cab.

Pilots flying in should plan to park at the Basler FBO on the Northeast corner of the airport, and contact Andy Miller at 888-411-4367 to arrange ground transportation.

Event Details

Tue, Nov 19, 2019 - 18:30 CST

EAA Aviation Center

3000 Poberezny Rd

Oshkosh, WI 54902
