

FAASTeam presents:

Avoiding Ground Operation Violations at Towered Airports

In recent months the number of runway incursions and airport movement violations has become of great concern. This seminar intends to address these issues.

The two hour event consists of two parts. The first portion consists of an FAA prepared video covering operations an signage permitting, interactive participation by the group.

The second of the two hours will be a general discussion, with examples of operations and violations at Wisconsin Towered Airports.

Participants are invited to bring examples and questions from their own experiences.

Directions: Seminar will be held in the conference room located just west of the Lobby first door on the south side of the hallway.
