

FAASTeam presents:

NOAA Presents Aircraft Icing

We've all heard that Ice is best in a coke, not an airplane. But what is aircraft icing? When is it likely for aircraft icing to occur? What are the types of ice for an aircraft? How can I tell if I am at risk of encountering structural icing?

These questions and more will be answered by our honored presenter, Rich Mamrosh. Rich is an experienced National Weather Service Aviation Forecaster and provides valuable insight into all aviation.

This is a free event you do not want to miss. Come early and learn. Education helps prevent incidents and accidents.

Arrive at 5:30pm for registration and social time. We will have hotdogs, soda, and water available. Register for this event at <https://icing.splashthat.com/>

Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.

Directions: This is in the old Flight Logistics Building, now the Pilotsmith @ Jet Air offices.

Aircraft Flying In: Park on a T in front of the building and use the door located next to the Flight Logistics sign to enter the building. Proceed to the front of the hangar.

Driving In: Park in the parking lots in front of the building. Additional parking is located to both the east and west in front of Jet Air Group.
