

FAASTeam presents:

Tailwheel Flying Unleashed

If you fly a Tailwheel Aircraft then this seminar is for YOU! Have you ever wondered if your CFI conducts the preflight of your airplane the same way as you do, then this seminar is for you! This interactive seminar will cover preflight, taxi, take off and landings as well as the often forgotten post flight walk around.

This interactive seminar will include a hands-on preflight inspection that will be conducted by two highly experienced Tailwheel CFIs: John Chmiel and Dan Dominguez, will show you some of the not so common oversight issues that are often missed during a preflight inspection and forgotten during the Annual Aircraft Inspection. You will be amazed all the things that you didn't know about all the mechanical issues plaguing Tailwheel Aircraft that could potentially result in an accident. You will be able to ask questions throughout the seminar.

Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.

Directions: Please follow signs to Wausau Municipal Airport, Wausau, WI.
