

FAASTeam presents:

Racine Landings Unraveled

If you fly airplanes then this seminar is a must! Takeoff and landing accidents account for 45% of all GA Accidents and Wisconsin had 18 landing accidents in 2022 alone, why is that? Is it that pilots aren't proficient? Is it that pilots forget the basics or is it because they try to save the landing rather than perform a go around. If you felt that the Engine Failure Startle Effect was worth your time to attend in 2022 then you will be pleased to know that the same team of CFI's have developed the Landings Unraveled seminar series. During this seminar we will answer these questions for you.

- Why are we talking about landings
 - Unstabilized Approaches
 - What is stabilized
 - What isn't
 - How do we stay safe
- Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.

Directions: Please follow signs to EAA Chapter 838 located at 3333 Green Bay Rd. Racine, WI.
