

FAASTeam presents:

Pro Tips for Pilots Those Nasty Thunderstorms

If you fly in Summer and like to stay out of the Weather then this webinar is for YOU! You are going to get a great insight into Thunderstorms through the eyes of a Pilot, as well as a Professor of Meteorology. This webinar will leave you with a better understanding of the dangers associated in flying near one of these monstrous storms that we have all seen and hopefully avoided while flying our light aircraft.

We will discuss preflight as well as inflight actions that we must take to stay safe. You will also be able to have the opportunity to have a question answered at the end of the presentation by our TEAM.

Directions: If you are new to our webinars and have not previously registered yourself then please click on the following link to register for this webinar which will allow you to gain access to the webinars for the remainder of the year.
