Representative EAA Webinars n/a

This is a 2 hour webinar consisting of;

Nothing is more frustrating for an aircraft owner than a disabling mechanical problem that occurs far from home in the middle of an important trip. Nothing is more embarrassing if the problem was the owner's fault. That's exactly what happened to maintenance expert Mike Busch one Saturday evening in July as he was flying his Cessna 310 from California to Air Venture 2023. Mike got on the brakes too early during what should have been an easy-peasy crosswind landing at Sioux Falls, South Dakota. The resulting blowout of the right main gear tire and tube disabled the aircraft and closed the runway for more than an hour. The remarkable series of fortuitous events that followed, allowing Mike and his two passengers to get to Oshkosh on schedule, is the subject of this webinar.
