

Chilly Checklist - Tips to Preheat Aircraft Engines

This FAA Safety Team WINGS and AMT Award webinar is being presented in the dark and chill of Northern Hemisphere winter, when aircraft engines are especially difficult to start. Prof. H. Paul Shuch discusses why, wherefore, and how to preheat your engine, review products on the market that will help you to do so, and even learn how to build your own budget pre-heater. Don't let low temperature starts ground or damage your aircraft!
