

EAA Chapter 93 Madison WI VMC Club

We'll start the evening with discussion around our Question of the Month. This month's question is:

How do airplane flight characteristics change as the CG is moved from a forward position to an aft position, and why?

After discussing this question, we'll watch a short flight scenario video and discuss how we would approach the situation. This is always good discussion as we learn from each other's experiences and share our aviation knowledge.

This month's video scenario is titled "A Tight Pattern". This month we'll fly along with a pilot who is doing pattern work to get practice at crosswind landings. And as they say at the end of each video, "what would you do?"

I hope you will join us this month as we continue our journey of becoming safer and more proficient pilots.

Event Details

Thu, May 9, 2024 at 19:00 CDT

**Morey Airplane Company
Middleton Airport**

8300 Airport Rd

Middleton, WI

Contact: SARAH POZDELL

(608) 335-2728
