

Madison IMC Club

We will start by sharing a video that sets-up our scenario, "Late Hold at Herlong" (Topic: Pilots in the digital age will tell you that avionics proficiency can erode even faster than an instrument scan. How will you handle a canceled clearance with a last-minute hold when you know at least three different ways to accomplish the task? Can you make the magic box behave in time?) Analyze the situation and compare your AMD with the video analysis.)

We will be discussing different course of action through input all of the attendees. Through our discussion you will learn that scenarios can be handled differently.

Follow signs to Dane County Regional Airport. Wisconsin Aviation is located at 3606 Corbin Ct. We will meet in the Main Conference Room.

A message from the National FAASTeam Manager
