

Tailwheels Are Cool

I don't know about You but there sure is a lot of activity and growth around the Tailwheel community. Back by popular demand, this "Tailwheel Workshop "Ground Loops not allowed" is definitely going to spur your interest. Our hosts are Tailwheel Expert Instructors, Authors of countless articles for EAA and beyond. In this two hour work shop Steve Krog, Bob Lussow and Carley Young will talk about the ins and outs of tailwheel aircraft.

We will show you what a proper tailwheel pre-flight looks like and what you need to know to stay out of trouble. You will get to crawl under a tailwheel airplane and learn that a proper pre-flight is required to stay safe. Attending this workshop will definitely open Your Eyes.

Please follow signs to the Hartford Municipal Airport
