

All You Wanted to Know About Stalls

Why are we so afraid of stalls? Your Presenter Brian Sagi, will dive into Stall Recognition and Recovery during this webinar.

Demonstrating aerodynamic stalls and stall recovery is required in FAA check rides at the Private, Commercial, and ATP levels. But let's face it, many pilots don't like to perform stalls and perhaps are even anxious about practicing stalls and stall recovery. In this talk we will learn about stalls and stall recovery and how to teach them in order that all of us become safer pilots.

Many General Aviation accidents could have been avoided if the pilots would have had a better grasp on stall recognition and would have been proficient in stall recovery. We will also learn about how real-world inadvertent stalls, including ones resulting in accidents, differ from the stalls we practice for FAA check rides.
