COYNE n/a**

Avionics Decisions:

We will start by sharing a video that sets-up our scenario, "A Panel Discussion" (Topic: Avionics decisions used to be simple. The options were few and the prices modest. New tech has brought great advances in safety and capability—but at the expense of, well, the expense. Decisions are even harder when the airplane is owned by a group with widely divergent priorities.)

During the discussion we will cover what instruments are needed for flight into (IMC) Instrument Meteorological Conditions. What happens when one or more fail and what backup battery powered instruments will help you stay safe.

Follow signs to Dane County Regional Airport. Wisconsin Aviation is located at 3606 Corbin Ct. We will meet in the Main Conference Room.

A message from the National FAASTeam Manager
