

## Safe Operation at Non-Towered Airports

FAA Certified Flight Instructor and Designated Pilot Examiner, **Prof. H. Paul Shuch** will share his over 5 decades of experience with you so you can be a safer and more knowledgeable pilot at non-towered airports. These days, most flight training occurs at towered airports, and new pilots may have limited experience operating in a non-towered environment. Yet some of the country's most interesting airports are non-towered. In this webinar, he will help you to become more self-reliant as you safely navigate the non-towered environment. By attending this webinar your knowledge of operating at a non-towered airport will be enhanced and ultimately safety will be enhanced.
