Select #: GL13138387

**Representative DANIEL MARK
COYNE n/a**

We will start by sharing a video that sets-up our scenario "**What a Headache**". (Topic: you can have a perfectly functioning airplane in perfectly flyable conditions and still have a potential problem with the pilot. How much worry is a headache that could be attributable to the recent head-banging turbulence- or could it be the first signs of something more consequential?

We will be discussing different course of action through input all of the attendees. Through our discussion you will learn that scenarios can be handled differently. The discussion will leave you with a clearer understanding of the issues that you can face on the enroute portion of the flight whether they are physiological, environmental or mechanical.

Follow signs to Dane County Regional Airport. Wisconsin Aviation is located at 3606 Corbin Ct. We will meet in the Main Conference Room.
