

EAA 18 VMC and IMC Club Meeting Timmerman Airport Civil Air Patrol Hangar

Event Details

VMC (Visual Meteorological Conditions) Question of the Month: How do airplane flight characteristics change as the CG is moved from a forward position to an aft position, and why. We will discuss the importance of the proper calculation and loading of the airplane in order for us to operate it safely.

IMC (Instrument Meteorological Conditions) Question of the month: How can runway centerline stripes be used to measure or monitor takeoff and landing performance? We view and discuss short videos presenting flight scenarios that any VFR (Visual Flight Rules) pilot can learn from others. Members discuss short videos and how they would respond to the given scenario. This is an open Forum for free ideas and we all learn from Shared Experience! All are welcome to join in the discussion.

We will be meeting in the Civil Air Patrol hangar as shown in the image below.

EAA

Spring City Timmerman FBO will be closing at 4:30 PM so no fuel will be available to those flying in to this event.

Tue, Aug 12, 2025 at 19:00 CDT
