

First Flight after an Annual Inspection

Do you understand all of the tasks required for an Aircraft Annual that your Mechanics accomplishes? **Do you know what you are responsible for? If the answer is I am not sure then this workshop is for you!**

There is a \$45 fee for this workshop/lunch to include 6 hour pilot training seminars, simulator time that will offer all of the three Basic Knowledge of WINGS and one Basic Flight Activity. The concept of these *workshops* is to show the pilot why WINGS makes a great alternative to the flight review and will demonstrate to the pilot that training in simulators is a great improvement in General Aviation Safety. We offer a Basic Flight Activity for A070405-07 Takeoffs, Landings, and Go-Arounds for the 1.5 hour simulator portion signed by your instructor.
