

Tailwheel Flying Techniques

This presentation will cover the basics of flying a tailwheel aircraft. Although some theory will be reviewed, the aim is to outline practical techniques as well as answering some of the age-old questions regarding flying a tailwheel aircraft, such as whether wheel or three-point is the better landing method to use. Steve Krog runs a flight school providing Piper Cub instruction and will share his vast tailwheel teaching experience and identify common errors and provide suggestions for techniques to safely fly tailwheel airplanes.
