

Inadvertent Flight into the Clouds

How do we recognize it and more importantly prevent it?

VFR flight into IMC is most often fatal. We have lost too many pilots to this. Come find out how to recognize the dangers. We will examine both real examples and scenarios for training. We can all learn from mistakes!

Bring your copilot and a few friends so we can all be safer in the sky!

You will learn more about the importance of a proper pre flight briefing and continuous situational awareness en-route and the services available to keep an eye on the weather as well as proper alternate airports.

Pilot Proficiency Center of the EAA Aviation Museum is located on the East end of the EAA Museum Building. Enter the door the the left of the door labeled "Conference Center"
