

Tailoring Flight Training for Safety and Effectiveness

- One-size-fits-all instruction is not the best path to safe and effective learning—and neither is a one-size-fits-all briefing. This session explores how CFIs can use a structured briefing methodology to tailor flight and ground training to each learner's unique strengths, weaknesses, experience level, and learning style. Instructors will gain practical strategies for setting clear intent, aligning lesson objectives, identifying likely challenges, and adapting communication before each lesson begins. Learn how personalized, purposeful briefings can improve student engagement, accelerate progress, enhance decision-making, and build a stronger culture of safety.

FAA WINGS credit available!

To receive WINGS/AMT credit fill out attendance sheet onsite.
