

Debriefing that Drives Learning Accountability and Safety in Flight Training

- Too many post-flight debriefs are rushed, vague, or skipped entirely—missing one of the most powerful tools for student growth and risk reduction. Based on the proven fighter pilot debrief process, this session explores how CFIs can use a structured debriefing methodology to turn every lesson into a learning advantage. Instructors will discuss how to create accountability without blame, identify root causes behind errors, reinforce sound decision-making, and tailor feedback to each student's stage of development. Learn how consistent, high-quality debriefs accelerate progress, improve instructor effectiveness, and strengthen a proactive safety culture across the flight school.
