

General Aviation Accidents Trends Causes and Safety Insights 2015 to 2025

This webinar provides a comprehensive analysis of general aviation accident trends over the last decade. CFI Ken Solosky will review key data on accident rates, common causes, and emerging patterns from 2015 to 2025. We will discuss the contributing factors behind these accidents, from pilot errors to mechanical failures, and highlight safety improvements made in recent years. The session will also focus on practical steps pilots can take to prevent accidents, improve operational safety, and enhance awareness of critical risk factors in general aviation.
