

EAA VFR Workshop Stabilized Approaches

Landing Accidents account for over 54% Wisconsin General Aviation Aircraft Accidents. If you want to learn from others then this **FREE** all-day workshop is for You! 3 hours of seminars, one hour simulator will certainly help in improving your knowledge and stick skills.

A Stable Approach is essential to a safe approach and landing and is a great way to avoid experiencing loss of control. The three seminars will **address accidents, stabilized approach criteria** and proper and **timely go-around** decision making. The simulator period will not only improve your scan but it will provide you with a safe environment that you can practice the handling of an aircraft in a unstablized situation and make a go-around decision where and when applicable and it can be repeated to increase your level of confidence.
