

VMC and IMC Scenario-based Safety Discussion

VMC Question of the Month: You're preflighting your airplane, and realize that you have not checked your ELT in a long time. The battery was replaced just under two years ago, but hasn't been tested since. Is there some way you can test the device without triggering a search and rescue event to ensure it still works properly? **Howard Kaney and Tim Meyer**, EAA, will be leading the group through the scenarios outlined.

IMC Question of the Month: What items does the FAA recommend be included in a pre-taxi briefing?

We will discuss the answers to the two questions of the month as well as the **VMC** and **IMC** video scenarios and discuss what we would do if we wound ourselves in the same situations or more importantly, what we would do to prevent ourselves from getting in to those situations in the first place.
