

VMC and IMC Scenario Based Safety Discussion

VMC Question of the Month: One focus area for improving safety revolves around Controlled Flight Into Terrain (CFIT). According to the FAA, what are some of the factors involved in CFIT accidents, and what precautions can be taken to avoid CFIT accidents?

IMC Question of the Month: You're about to depart on an IFR flight and although icing is not specifically forecast for your area, conditions include visible moisture and temperatures nearing freezing. At what point should you turn on your pitot heat?

We will discuss the answers to the two questions of the month as well as the **VMC** and **IMC** video scenarios and discuss what we would do if we wound ourselves in the same situations ro more importantly, what we would do to prevent ourselves from getting in to those situations in the first place.
