

Review of Airspace Special Use Airspace and TFR

Do You know Your Airspace? If you are wondering what a Temporary Flight Restriction is and where to find them then this esminar is for You!

This seminar will be led by **Scott Cabot**, Ground Instructor at the Morey Airplane Company. Scott will not only review the different types of airspace but he will answer any questions that you may have. Knowledge of the airspace along a route of flight is an important part preflight planning. In this program we will review the six classes of airspace with emphasis on the ones most often encountered by general aviation pilots. Special use airspace will also be reviewed along with TFR's. Aircraft intercept procedures will be covered.

Please bring along your questions so that we can learn from each other.

Parking available. Proceed to the conference room inside Morey Airplane Company terminal building.
