

North Star Flyers: Practical Flight Planning (Members Only)

Our training to become pilots includes the nuts and bolts of planning routes, and we become whizzes at interpreting charts and spinning the E-6B dials. But there is a wealth of data available to today's pilot that can be had with a few mouse-clicks or a phone call, information that goes a long way to eliminating nasty surprises along the way. In this seminar we'll discuss some of those resources.

Directions: The meeting will be held in the classroom at Sim Flite Minnesota, in the first floor of the red and white hangar adjacent to RC Avionics at Anoka County Airport.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
