

# North Star Flyers: Powered Aircraft Cohabiting with Gliders (Members Only)

Learn about glider operations from pre-launch to thermalling and cross country flights to landing and how gliders and powered aircraft can safely occupy the airspace and runway environment together. Learn why gliders do what they do during launch and all phases of flight to better understand the risks.

You will also learn how easy it is to get a glider license, whether an initial license or an add-on to your current license. Please note: Facility limitations restrict attendance at this seminar to members only. Please contact Jack Shelton, FAAST representative, if you would like this seminar presented at another venue.

**Directions:** The meeting will be held in the classroom at Sim Flite Minnesota, in the first floor of the red and white hangar adjacent to RC Avionics at Anoka County Airport.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
