

Survival Medicine for Aviators

Surviving an aviation-related accident, or an event which leaves you and your passengers stranded in a wilderness environment, is something which needs to be planned. A review of wilderness survival medicine will help prepare you for meeting the challenges of that event. Special emphasis will be given to facing challenges in Winter conditions. This presentation will be of interest to anyone who might experience problems in a cold environment (snowmobiling, etc).

Directions: Airmotive Hangar

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
