

TIME UPDATE: Risk Management: A Psychologists Perspective

Over the past 50 years, the safety record of airline travel, corporate aviation and all branches of military aviation have all improved dramatically. General Aviation private light airplane flying has not, however! This safety presentation explores possible reasons for this. The presentation examines methods of risk management and applications of methods. The presentation attempts to simplify concepts of risk management with the hope that pilots in attendance will apply these principles to their daily flying activity. This is definitely not your normal run of the mill Risk Management seminar. This seminar takes a definite new thought provoking look at Risk Management!

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
