

Engine Failures in Single-Engine Airplanes

Engine failures are like sharks: Everyone's afraid of them, but they bite very few of us. No matter how rare, when one happens we've got to get it right the first time. In this seminar we'll discuss the causes of engine failure, risk management strategies, and how to get on the ground safely in the event one happens to you. Please note:

Facility limitations restrict attendance at this seminar to only 15 pilots; if you register and decide not to attend, please delete your registration to allow another to join us. Please contact Jack Shelton, FAAST representative, if you would like this seminar presented at another venue.

Directions: The meeting will be held in the classroom at Sim Flite Minnesota, in the first floor of the red and white hangar adjacent to RC Avionics at Anoka County Airport.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
