

## You've Got What?!!!

We all get an ache or pain, a cold or a cramp every now and then. But when should you tell tall tales in the FBO rather than bore holes in the sky? What is safe and what isn't? What happens if you have a significant illness strike? How will you get back into the cockpit? Can you work with the FAA on your issue? There isn't anyone better to explain these things than Dr Jim Lakin. Not only is he an Airmen's Medical Examiner but he's a practicing Medical Doctor, an airplane owner (Cirrus SR22), a CFI, CFII, MEI, a pilot rated to ATP single and multi-engine and Author, "Aeromedical Forum" for the Minnesota Flyer magazine.

**Directions:** This seminar will be located in the Modern Avionics Hanger.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
