

Flying and Dodging the Powered Parachute!

Seminar Description: What is a powered parachute? Why in the world would I need to know about powered parachutes? Are they in the traffic pattern? How fast do they go? What are the rules? What does it take to fly one? Where can they be used? Will I see one at an airport? What kind of conditions can they fly in? What happens if you do see one in the traffic pattern? This and more....plus, Tom tells me he will bring his powered parachute in for show and tell! Included will be a news special report video done by WCCO.

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
