

Hazardous Thoughts

What are the hazardous attitudes that lead pilots into bad situations? What are the antidotes to these attitudes that can help make us safer pilots? Real-life examples of situations and incidents involving these hazardous attitudes.

What is Aeronautical Decision Making (ADM) and Cockpit Resource Management (CRM) as related to single pilot operations? Enjoy a slideshow of some of Jim's aviation photography to get you excited about the upcoming warm flying season. Flying is serious business but it's also FUN! A sprinkling of aviation humor throughout the presentation will hopefully help entertain and amuse as we learn about these subjects. Don't miss this one!

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
