

Minnesota FAASTeam presents:

Case Study Cessna 195 Seaplane Accident

A pilot does everything he can to save his passengers and his plane

After hitting something and putting a hole in a float, what should you do? Will the plane sink?

Will the plane stay afloat? Should you add power? Should you idle? What happens when the plane flips over? Where are those lifejackets? How do you get everyone out? Now what?

And then, you are a celebrity in a real hurry! Newspapers, TV, Radiio all want to talk to you.

What should you say? Should you wait a few days before things settle down? This and more!

Directions: This seminar will be located in the Madden's Town Hall

FROM THE EAST GULL LAKE AIRPORT (9Y2): Contact Madden's Resort for complimentary transportation at (218) 829-2811. NOTICE: The 9Y2 airport will be closed via NOTAM on Friday, May 20th from 1630-1930 CDT. Pilots are encouraged to check NOTAMS prior to arrival or departure.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
