

# PAST EVENT! Test Pilot 101 - Returning Your Aircraft to Service After Maintenance

This interactive session will provide practices and techniques for keeping you safe AND legal when receiving your aircraft following maintenance.

We'll be taking a look at accident case studies and trends surrounding "maintenance gone bad".

Do you find the return to service paperwork to be a bit daunting? Do you know when you'll receive an 8130 vs. a 337 vs. an ICA??? We've got you covered! From preflight to shutdown, we'll be talking about those extra considerations you can apply to help catch those hidden threats. Be prepared to also do a little "hangar flying" by sharing your advanced preflight techniques with the other attendees.

**Directions:** Airlake Airport, Hotel Lane

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

**Tue, Aug 30, 2016 - 18:00 CDT**
