

Minnesota FAASTeam presents:

Aeronautical Decision Making and Risk Management for sUAS Operators

Aeronautical Decision Making (ADM) and Risk Management may be new concepts to commercial sUAS operators, but they are integral components to ensuring safety in the National Airspace System. This free webinar will guide sUAS operators through both concepts and then show how they can be applied using real-world scenarios.

The future of Part 107 Regulations depends on continued safe sUAS operations in the National Airspace System. Learning and applying these two concepts to your commercial sUAS operation will pay huge dividends now and into the future.

Directions: There are two registrations you should make! First, register with FAASafety.gov (this website) to receive appropriate WINGS credit. Then register for Aeronautical Decision Making and Risk Management for sUAS Operators on Nov 22, 2016 7:00 PM CST at:

<https://attendee.gotowebinar.com/register/8861957445641443330>

Webinar ID: 650-711-531

After registering, you will receive a confirmation email containing information about joining the webinar.
